PREFACE

All information presented within this document represents our exploration of the HTK software. We make no guarantee of things things things

INTRODUCTION

This is the introduction. This is the introduction. This is the introduction. This is the introduction. This is the introduction. This is the introduction.

PART I

HIDDEN MARKOV MODEL TOOLKIT SOFTWARE SUITE

CHAPTER 1

INSTALLATION OF HTK SOFTWARE

1.1 General Installation information

The website for HTK can be found [here](#). The HTK developers require that you [register for a username and password](#) through their site before downloading their software. After registering, visit the [downloads](#) page and download the HTK source code (available as a tarball). It is also useful to download the HTKBook as a PDF (available on the downloads page below the software). If you do not wish to download the book, you can [view the book online](#) after registering.

1.2 Mac OS X

In order to install HTK for Mac OS X, you first need to make sure that you have Xcode developer tools and X11 installed.

What follows are the installation instructions taken *directly from the README in the root directory of the unzipped htk/ directory*, save a bit of formatting. We do not claim this work, and repeat it here only for convenience.

1.2.0.1 *Compiling & Installing HTK under UNIX/Linux, OS X or Cygwin*

After unpacking the sources, cd to the htk directory.

There are now two ways to install HTK, the "traditional" and the "new". Up to now HTK has always installed its tools as they were built, and installed them to a directory such as "bin.linux" so that binaries for different architectures can be installed in a home directory say. If you want to install in this way, please add the option "--enable-trad-htk" when you run configure.

The "new" method installs by default into /usr/local/bin (equivalent to a configure option of "--prefix=/usr/local").

1. decide which of the above methods you wish to use
2. cd to htk, then run ./configure (with appropriate options, run "./configure --help" if unsure). If you don't want to build the programs in HLMTools add the --disable-hlmttools option.
3. make all
4. make install

Running "make install" will install them. This step may need to be done as root, if you are not installing them in your home directory.

Notes for particular Unix variants:

Solaris: if "make" isn't installed you may need to add /opt/sfw/bin and /usr/ccs/bin to your path and run "./configure MAKE=gmake" with any other options you require. Then run "gmake" instead of "make", alternatively you can create a symbolic link called "make" somewhere in your path to /opt/sfw/bin/gmake

1.3 Windows

Once again, what follows are the installation instructions taken *directly from the README in the root directory of the unzipped htk/ directory*, save a bit of formatting. We do not claim this work, and repeat it here only for convenience.

1.3.0.2 Compiling & Installing HTK under Windows

Prerequisites:

- HTK has been verified to compile using Microsoft Visual Studio.
- For testing, you will require a Perl interpreter such as ActivePerl.
- You will need a tool such as 7-zip or winzip (commercial) for unpacking the HTK source code archive.
- It is helpful if you have some familiarity with using the DOS command line interface, as you will need to interact with it in order to compile, install and run HTK.
- Ensure that your PATH contains:

4 INSTALLATION OF HTK SOFTWARE

C:\Program Files\Microsoft Visual Studio .NET 2003\VC7\bin

Or if you are using older versions:

C:\Program Files\Microsoft Visual Studio\VC98\bin

Compilation:

1. Unpack the HTK sources using 7-zip.
2. Open a DOS command window: Click Start, select Run type cmd at the prompt and click OK.
3. cd into the directory in which you unpacked the sources.
4. cd into the htk directory. Type:

```
cd htk
```

5. Create a directory for the library and tools. Type:

```
mkdir bin.win32
```

6. Run VCVARS32 (it should be in your path, see prerequisites above) 7. Build the HTK Library, which provides the common functionality used by the HTK Tools. Enter the following commands:

```
cd HTKLib
nmake /f htk_htklib_nt.mkf all
cd ..
```

8. Build the HTK Tools

```
cd HTKTools
nmake /f htk_htktools_nt.mkf all
cd ..
cd HLMLib
nmake /f htk_hlmlib_nt.mkf all
cd ..
cd HLMTTools
nmake /f htk_hlmttools_nt.mkf all
cd ..
```

Installation:

The HTK tools have now been built and are in the bin.win32 directory. You should add this directory to your PATH, so that you can run them easily from the command line in future.

1.4 Command Line Actions

CHAPTER 2

TRAINING CORPUS ACQUISITION

CHAPTER 3

TRAINING CORPUS WITH HTK

The sheer volume of answers can often stifle insight...The purpose of computing is insight, not numbers.

—Hamming [4]

3.1 Record or Input Sound Files

Here is some text.

3.2 Labeling the Sound Files

Here are some things you can do for a special section head.

3.3 General Remarks

Here is some normal text. Here is some normal text. Here is some normal text.

CHAPTER 4

CODING THE DATA

4.1 Mel Frequency Cepstral Coefficients

Here we describe what a MFCC is and its usefulness to us.

4.2 Obtaining .mfcc Files

4.2.1 Configuration File

Screenshot of the configuration file along with justification of the various parameters

4.2.1.1 *The Creation of targetlist.txt*

4.3 Command Line Actions

CHAPTER 5

SETTING PARAMETERS FOR THE HIDDEN MARKOV MODEL

Multiple things should happen here:

1. Explain what an HMM is and what it is useful for
2. Explain particularly why it works for what we are doing
3. Describe the input parameters to a hidden markov model
4. Explain why we made any changes to what the original tutorial had/any issues we encountered (i.e. errors being raised when we tried to have too many states due to not having enough training examples for all those states)

I have some sample sections below following the list above:

5.1 What is a Hidden Markov Model?

Here is some sample text.

5.2 HMMs and Accent Detection

Lorem ipsum Lorem ipsum Lorem ipsum Lorem ipsum Lorem ipsum Lorem ipsum

5.3 Input Parameters to HMMs

Lorem ipsum Lorem ipsum Lorem ipsum Lorem ipsum Lorem ipsum Lorem ipsum

5.4 Justification for our Modifications

5.5 Command Line Actions

CHAPTER 6

DEFINING THE GRAMMAR OF YOUR NETWORK

6.1 What does that even mean

6.2 Define your Grammar

6.3 Define your Dictionary

6.4 Generating the Network

6.5 Command Line Actions

CHAPTER 7

TESTING WITH NEW SAMPLES

Corresponds to the Recognition chapter (Moreau ch. 7)

7.1 Command Line Actions

PART II

DATA VISUALIZATION

PART III

ERROR HANDLING AND GENERAL TIPS

APPENDIX A

ERROR HANDLING

Errors that crop up when using HTK can seem confusing initially, but they can be debugged with a bit of critical thinking and some hints from outside sources. We found the following sources helpful when debugging:

- [Ohio State University: Understanding HTK Error Messages](#)
- [Columbia University: Summary of Errors by Tool and Module](#)

APPENDIX B

SOFTWARE USED

Just list all software used and why we used it

1. Audacity
2. HTK –*i* Maybe even list each of the things we used under HTK & why, i.e. HLab for labeling, HParse for whatever
3. was there anything else?

APPENDIX C
